

MUHAMMAD ABDULLAH

Zaferwal, Narowal Punjab, Pakistan | +92 3086074381 | abdullahg1921@gmail.com | www.linkedin.com/in/m-abd052

Results-driven IT Support, Cloud, and DevOps Specialist with proven expertise in cloud infrastructure, networking, Linux system administration, and automation. Skilled in designing, deploying, and managing secure, scalable, and resilient environments through containerization, CI/CD practices, configuration management, and system hardening. Experienced in streamlining operations, improving release cycles, and enhancing reliability with DevOps methodologies. Recognized for delivering enterprise-grade solutions with strong communication, leadership, and problem-solving abilities, while committed to continuous learning and driving business innovation.

EDUCATION

Bachelor of Science in Computer System Engineering

- Mirpur University of Science and Technology
- Relevant coursework: Computer Networks, Operating Systems, Cloud Computing

EXPERIENCE

Technical Labs | Self-Learning / Online Training

2023 – present

- AWS Cloud Engineering:** Provisioned EC2, configured S3 with IAM/MFA, managed VPC networking and security groups, deployed Lambda, enabled Auto Scaling with ELB, and set up Route 53 DNS.
- CCNA Networking Labs:** Completed **300+ labs/lectures** covering Cisco routing & switching, VLANs, NAT, DHCP, ACLs, RIP, OSPF, and BGP in Packet Tracer/GNS3.
- Linux System Administration Labs:** Installed/managed CentOS & Ubuntu servers, configured users/groups, applied security hardening, and automated tasks with cron jobs.
- DevOps & Automation:** GitHub Actions, GitLab CI/CD, Jenkins, Terraform, Ansible
- Collaboration:** Git, GitHub, Problem Solving, Teamwork, Practiced repo setup, commits, branching/merging, stashing, and remote collaboration.
- Containers & Orchestration:** Docker (containers, images, networking), Kubernetes (basics)
- Monitoring Tools:** Prometheus, Grafana (Basics)

Network Intern | SkyTelecom Pvt. Ltd. | Mirpur, Ajk

Sep 2024 – Oct 2024

- Configured and troubleshooted **Cisco routers, switches, and ONU devices** during live ISP operations, ensuring minimal downtime.
- Implemented and tested **VLANs, IP subnetting, and ACLs** for secure traffic segmentation and optimized network performance.
- Configured **DHCP pools and NAT** on routers for multi-VLAN environments, providing seamless IP address management.
- Monitored and analyzed network traffic with **Wireshark** to identify issues, troubleshoot bottlenecks, and validate configurations.
- Assisted in managing **firewall rules, STP, and routing protocols (RIP, OSPF, BGP)** in a real ISP environment.
- Prepared **network documentation** of operational procedures and topology diagrams for internal use and training.

DevOps Intern | Code Sentinel | Remote

Aug 2025 – present

- Helped build and maintain **CI/CD pipelines** to run tests, build Docker images, and deploy to staging environments.
 - **Containerized services** with Docker, optimized Dockerfiles, and resolved container networking issues.
 - Provisioned and managed **AWS resources** (IAM roles/policies, EC2, S3, VPC security groups, Route 53 records) via Console and CLI.
 - Implemented **ELB + Auto Scaling** basics to improve availability for demo workloads.
 - Collaborated using **Git/GitHub** (branches, PRs, reviews) and documented SOPs/runbooks for repeatable operations.
 - Supported **monitoring and logging** with AWS CloudWatch, and participated in incident reviews.
-

PROJECTS

- **Docker Projects:** Built and managed Docker containers, configured networks, and worked with DockerHub repositories.
 - **CI/CD Pipeline (GitHub Actions):** Configured a simple CI pipeline to automatically run unit tests on code push, ensuring build failure on test errors.
 - **Terraform Infrastructure Automation:** Wrote Terraform scripts to provision AWS EC2 instances and automated Nginx setup using provisioners.
 - **ReverseRDP (POC):** Developed a secure remote desktop relay using Linux and Windows agent, integrating MongoDB authentication to allow secure mstsc access without exposing agent ports.
-

SKILLS

- AWS (EC2, S3, IAM, VPC, Route 53, Lambda, Auto Scaling)
- Linux System Administration (Ubuntu, CentOS)
- Networking (CCNA, VLANs, Subnetting, Routing)
- Docker & Kubernetes (Containers, Orchestration, Networking)
- Infrastructure as Code (Terraform, Ansible)
- CI/CD Pipelines (GitHub Actions, GitLab CI/CD, Jenkins)
- Monitoring & Logging (Prometheus, Grafana, CloudWatch)
- Scripting & Automation (Bash, Python)
- Git & GitHub (Version Control, Collaboration)
- Communication, Problem Solving & Team Collaboration
